15 YEARS OF INNOVATION

SILENCER^{co}

Fifteen years of innovation within the firearms market. Fifteen years of listening to our customers. Fifteen years of purifying the shooting experience.

In 2023 we celebrate fifteen years of SilencerCo.

Our start was simple. The Sparrow, a .22 suppressor. Cutting-edge technology. Serviceable. Machined and welded in a garage.

Since that humble beginning, SilencerCo has ascended to an industry-leading suppressor and gun parts company, paving the way for a better, and more pure shooting experience.

SilencerCo has from its inception been both a category creator and a trend setter. From the Osprey, the first non-round pistol silencer, through the Maxim 9, a first integrally suppressed and hearing safe 9mm, to the Salvo 12, the only commercially-viable and fully modular shotgun suppressor.

We at SilencerCo have always known that the perfect firearm should have a silencer. The essence of good shooting does not include ear ringing muzzle blast. It is this passion that drives us. We look forward to the many years ahead as we continue to enhance and purify the shooting experience.

SilencerCo. Shoot Purified.

The Velos LBP is SilencerCo's answer for customers seeking optimal performance from a 5.56mm silencer. The balance of exceptional sound performance without adding back pressure to the operating system of the host firearm sets it above the rest. Incorporating newer manufacturing processes the 3d printed Inconel 625 core is fully welded to the 17-4 front and rear modules, making this product unlike anything else on the market. It's compatible with SilencerCo's Charlie accessories and has no barrel length restrictions. It's the most durable suppressor we have ever made, in part, due to the inclusion of our patented Hoplon Blast Baffle. To top it all off, we used V-Series Cerakote to make sure that the finish will hold up to extreme use.
